**Standard of Cover Fire & Emergency Services Study.** The study is moving along with all the information provided that was requested by our consultant. Staff will receive the preliminary findings mid-December, a draft report mid-January and the final report late February. The information provided in the report will inform the Board and community on both current state of delivery of fire and emergency medical services and future needs for Los Osos.

**Cabrillo Stormwater Basin/FEMA Update.** Staff was finally able to complete all the needed information and provide it to FEMA. There will be a period where questions will be asked and responses will be required to various elements required in the submittal. A timeline for FEMA to complete their review is unknown at this time.

Staff continues to work with the Board working group and our geotechnical consultant, Yeh & Associates, to formulate a plan to ensure the long-term integrity of the basin's north berm.

**Integrated Waste Management Authority (IWMA) Update.** The County Board of Supervisors will be deciding whether rejoin the IWMA at their October 31<sup>st</sup> meeting. It is anticipated that they will rejoin which will help all the residents of the county. Having one organization to administer programs and services will create consistency in the delivery of services and provide cost efficiencies which will benefit solid waste rate payers.

**Staff Recognitions.** Two of our staff members celebrated a work anniversary this past month. Alicia Zuniga, Utility Billing Specialist, and Ehan Good, Water Resource Operator, both celebrated four years of service with the District. We are very grateful to Alicia and Ehan for their hard work and dedication to the District and the community.
